10 Rules For Buying Stocks & Shares

Authored by: JB MARWOOD

Narrated by: Becky White

STANDARD DISCLAIMER

This book is an educational document and is sold with the understanding that neither the author nor publisher will accept any responsibility for losses or risks as a direct or indirect result of using ideas, applications or trading systems described in this book. Trading systems are presented in a fair and accurate way but may benefit from extra testing and further customization. Trading in financial instruments (such as equities, fixed income, foreign exchange, futures, options, CFDs and all other types of exchange traded or over-the-counter financial instruments) carries a high degree of risk and is only suitable for investors who are able to sustain substantial losses. In the case of margin trading (such as futures, options, CFDs or leveraged equity trading, for instance), the risk of loss could be greater than the amount the investor has initially deposited into their account. Hypothetical or simulated performance results have certain limitations and past performance is not indicative of future results. We cannot guarantee profits or freedom from loss and you are solely responsible for making your own investment decisions. The author and publisher, its owners, or its representatives are not registered as securities broker-dealers or investment advisors either with any state securities regulatory authority.

How To Get In Touch

I really enjoyed putting this audiobook together and hope that you enjoy listening to it. If you have any questions or feedback, you can contact me directly at joe@jbmarwood.com.

I also hope you can join me at the following websites where you will find more content and discussion. I set up both websites to help traders and investors navigate the markets and it's something I really enjoy doing. Make sure to check them out at: <http://jbmarwood.com> and <http://profitsquawk.com>.

Video Course

Also, please note that there is a video course to go along with this audiobook (and this book was created in response to a number of requests from students inside the course itself who wanted to see the strategy in book form). If you would like to join the course, watch the walkthrough videos and see the system tested in real time, simply use the link <http://jbmarwood.com/valuecourse> and claim the special audiobook discount. The video course is free to those who have purchased this audiobook.

CHAPTER 1: GETTING STARTED

Table 1

The 10 Ben Graham Rules:

- 1) An earnings-to-price yield of twice the triple-A bond. If the triple-A bond yield is, say 8%, then the required earnings yield is 16%. In reciprocal form, that's a price/earnings ratio of 6.25.
- 2) A P/E ratio down to four-tenth of the highest average P/E ratio the stock attained in the most recent five years. (Average P/E ratio was defined as average stock price for a given year divided by the earnings for that year.)
- 3) A dividend yield of two-thirds the triple-A bond yield.
- 4) A stock price down to two-thirds of tangible book value per share.
- 5) A stock price down to two-thirds of "net current asset value" or "net quick liquidation value." This figure is defined as current assets less total debt. Fixed assets are not included.
- 6) Total debt less than tangible book value.
- 7) Current ratio (current assets divided by current liabilities) of two or more.
- 8) Total debt equal or less than twice the net quick liquidation value as defined in No.5.
- 9) Earnings growth over the most recent ten years of 7% compounded - that is a doubling of earnings in a ten-year period.
- 10) Stability of growth in earnings, defined as no more than two declines of 5% or greater in year-end earnings (relative to the previous year) in the most recent ten years.

Figure 10. Stop losses and market timing hedges

The screenshot displays a software interface for a simulation. At the top, there is a horizontal row of tabs: a double-headed arrow icon, GENERAL, POSITION SIZING, UNIVERSE & RANKING, BUY, SELL, STOP LOSS, HEDGE MKT TIMING (which is highlighted with a light blue background), PERIOD & RESTRICTIONS, and REVIEW. Below this row is a secondary set of buttons: PREV, NEXT, REVIEW, and RE-RUN SIMULATION (highlighted in dark blue). To the right of these buttons are two radio buttons labeled 'Enable' and 'Disable'. The 'Disable' radio button is selected, indicated by a small black dot inside the circle. A mouse cursor is positioned over the 'Disable' radio button. The entire interface is set against a light gray background.

CHAPTER 9: 10 MORE RULES FOR SUPER-SIZING RETURNS (QUALITATIVE)

Figure 34.

Alimera Sciences, Inc., a pharmaceutical company, engages in the research, development, and commercialization of prescription ophthalmic pharmaceuticals in the United States and internationally. The company focuses on diseases affecting the back of the eye or retina. The company offers ILUVIEN, an intravitreal implant for the treatment of diabetic macular edema (DME), which is a disease of the retina that affects individuals with diabetes, could lead to severe vision loss and blindness. Its ILUVIEN is inserted in the back of the patient's eye to a placement site that uses the eye's natural fluid dynamics to deliver the corticosteroid fluocinolone acetonide (FAc). It license agreements with pSivida US, Inc. for the development and sale of ILUVIEN, and a delivery device to deliver other corticosteroids to the back of the eye for the treatment and prevention of eye diseases in humans (ot than uveitis) or to treat DME. Alimera Sciences, Inc. was founded in 2003 and is headquartered in Alpharetta, Georgia.

About The Author

Joe Marwood is an independent trader and investor specialising in stock trading, stock investing and trading systems. He is a former professional futures trader and now operates through his own private company.

Marwood started his career trading the FTSE 100 future and German Bund for a trading firm in London, UK and he worked right through the financial crisis of 2008/2009. He has a passion for building mechanical trading strategies and uses a blend of fundamental and technical analysis to find low-risk investment opportunities. He was taught how to trade by the former head of trading at a leading German investment bank and is also an established financial writer, author of a number of books on stock trading, and a regular Seeking Alpha contributor. He is also the owner of <http://jbmarwood.com> and <http://profitsquawk.com>
