

# GAINING FOCUS IN YOUR BUSINESS

This is about your fundamental learning skills. It's also about re-discovering the basics of business operations and assessing what changes need to be implemented in order to claim ownership of your journey to success. It's about becoming a business owner and not just a self-employed worker.

You will also receive some excellent tools with which to set goals, work on your plans and create a diary that will allow you to steal your time back – moving your business from chaos to control.

Regards,  
John Millar
